

Code Enforcement Guide:

HELPING BETTER UNDERSTAND SIGHT DISTANCE TRIANGLES

What Are Sight Distance Triangles and Why Are They Important?

A sight distance triangle is a mandatory, unobstructed, triangular-shaped area at an intersection designed to allow a driver to see approaching traffic and pedestrians. It ensures motorists have enough time to stop, slow down or safely turn onto the main road, preventing accidents.

CITY ORDINANCE

Section 103. Nuisances Affecting Peace and Safety

The following are declared to be public nuisances affecting public peace and safety:

A. All trees, hedges, signs or other obstructions, or any portion of the same, located within a sight-distance triangle which prevent persons driving vehicles approaching an intersection of streets from having a clear view of traffic approaching such intersection. Sight-distance triangle shall mean the area within an imaginary triangle formed at a street corner as follows: Extend the curb lines (or the edge of the pavement where no curbs exist) into the street to a point where those lines intersect; from that point of intersection, measure along both curb lines (or edges of pavement) to two (2) points, each of which is thirty-five (35) feet from the point of intersection; the connecting of these three (3) points shall form the sight-distance triangle;
